

Feedback for RRMP Research Presentation [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Mario Hruschka
Details of any extensions etc:	Submission Attempt: Formative

The formative is laid out professionally showing your intentions for your slides.

Any acronyms that you use, ensure that you use full words in the first instance and then just the acronym thereafter. You can't assume that your audience has prior knowledge of your discussion and its detail.

It is clear that you have knowledge regarding the discussion that you intend to engage with. There is a broad discussion that sits around the key context that you intend to investigate. It may well be that one subject does directly feed into another, and that there is a 'golden thread' running through the whole content when you come to deliver it, but please be mindful of trying to apply too much information into a short period of time. It is better to pick one specific discussion, deep research that and then focus on discussing that point in-depth.

All I would say is make sure that tangents don't develop, as you only have 15 minutes to discuss your subject so please do keep the core context focused.

Wishing you the very best now for your summative presentation,

With best wishes

Karen
